POST-PANDEMIC SDG POLICY

Following the adoption of Agenda 2030, the Indonesian government mainstreamed the SDGs into the development planning, by aligning the ~~Sustainable Development Goals~~ indicators with the strategy and priorities of the national development

▲
plan.

The impacts of the pandemic on our SDGs have been identified as:

⇒ **Economic risks**, including a decrease in people's purchasing power, increase in poverty rate, increase in unemployment, and a gap increase of gini ratio.

→ Strengthening disaster resilience system, including low-carbon development and climate resilience with specific strategies for disaster

resilience as well as prevention, preparedness and early warning response for

→ Economic recovery reform by promoting an inclusive economy through

→ Bangka Belitung has fewer small islands compared to Maluku.
