

Thirdly, we build technology like the Terrorist Content Analytics Platform (TCAP) - more information at <http://www.terrorismanalytics.org> - that automates the process of identifying, verifying, alerting, and archiving terrorist content. As part of this we only include content that is officially created by terrorist organisations designated by the UN, EU, and other democratic jurisdictions. We also provide software engineering and data science support to

At Tech Against Terrorism, we believe that upholding human rights and freedom of expression is essential in
