

Global Roadmap for Accelerated SDG7 Action in Support of the 2030 Agenda for Sustainable Development and the Paris Agreement on Climate Change¹

1. On 24 September 2021, over 130 Heads of State and Government, high representatives and multi-stakeholder leaders gathered for the High-level Dialogue on Energy to promote implementation of the energy

Annual investment in access to electricity increased to US\$ 35 billion and in access to clean cooking increased to US\$ 25 billion.

100% increase in modern renewables capacity globally.

Double annual investment in renewable energy and energy efficiency globally.

No new coal power plans in the pipeline after 2021.

Fossil fuel consumption subsidies re-directed towards renewable energy and energy efficiency.

30 million jobs in renewable energy and energy efficiency.

2030 milestones:

Universal access to electricity and clean cooking solutions.

Triple global renewable power capacity.

Double the global rate of improvement in energy efficiency.

Triple annual investment for renewable energy and energy efficiency globally.

Phase out coal power plans within the OECD by 2030 and globally by 2040.

60 million jobs in renewable energy and energy efficiency.

Universal access to electricity in all healthcare facilities and all schools worldwide.

6. In achieving these milestones, the most vulnerable countries, in particular, African countries, least developed countries, landlocked developing countries and small island developing States, deserve special attention, as investments in renewable energy in these countries will have a significant positive impact across different SDGs and exemplify the true spirit of leaving no one behind.
7. women in the design, production and distribution of modern energy services, including for productive uses, as well as equal representation of women in decision-making process in the area of energy.
8. Achieving these milestones by 2025 and 2030 will also fir

governments, must step up and strengthen their efforts to drive the global energy transition forward by forming transformational partnerships.

10. Energy Compacts are a key vehicle to translate the global roadmap into concrete actions and partnerships. Additional Energy Compacts should be continuously mobilized, including through a global energy compact action network, supported by UN-Energy.
11. The United Nations system, supported by UN-Energy, should significantly scale up its efforts towards attaining SDG 7 and net zero emissions. UN-Energy should be strengthened to support UN entities and other partners, including by facilitating coordination and monitoring progress of Energy Compacts, towards implementation of the global roadmap.
12. The High-level Political Forum on sustainable development and other relevant intergovernmental platforms, including on biodiversity, climate change, food systems, ocean, science, technology and innovation, transport and water, should be leveraged to accelerate SDG 7 action. The follow up to the Dialogue, including through Energy Compacts, should lead to significant
