

PRESS RELEASE

UN Secretary-General issues new global roadmap to secure clean energy access

The Secretariat of the High-level Dialogue on Energy today also issued a report, which provides more details on the roadmap's recommendations, as well as the statements and commitments made at the High-level Dialogue.

Spearheading partners, including

moving ahead, the global roadmap urges governments, businesses and all stakeholders to step up and drive the global energy transition forward through transformational partnerships. Additional energy impacts should continue to be mobilised, including through a global energy compact action network, supported by UN Energy, the coordinating body that brings together over 200 UN system and international organisations working on various aspects of sustainable energy.

The roadmap calls for the UN system to significantly scale up its efforts towards attaining SDG 7 and net zero emissions, and for strengthening UN Energy, which will coordinate and monitor progress on the energy impacts and implementation of the roadmap through the 2030 target year.

Under the leadership of its co-chairs, Achim Steiner, Administrator of UN Women, and Aamilola Agunbiyi, the Special Representative of the UN Secretary-General for Sustainable Energy for All, who have also served as co-chairs of the High-level Dialogue, UN Energy will continue to spearhead commitments and partnerships and sustain the momentum created by the Dialogue, including the energy impacts. Serving as the Secretariat for UN Energy is UN Women, under the leadership of Under-Secretary-General Liu Chenmin, who also served as Dialogue Secretary-General.
