

Statement by Mr. Sanga Panggabean, First Secretary at the Permanent Mission of Indonesia to the United Nations (26 April 2006)

Mr. Chairman,

It is in this connection that my delegation would like to support the DPI for the new strategic innovations it has adopted in the expansion of its operational base by building new partnership with Governments, civil society and the private sector, investing more in information and communication technologies and bolstering its information presence in key locations by reallocating resources and strengthening professional staffing.

however, this assignment could become more difficult for DPI, unless it is equipped with an adequate budget. We should focus our energies on finding a solution to this problem.

Thank you Mr. Chairman.
