Chapeau

Youths Enterprise Development & Innovation Society (YEDIS) is a nongovernmental organization that promoEMChapter

I. Sustainable development and financing for development

Constant Orientation, Collaboration, and partnership with all local actors, including Civil Society Organizations, Community leaders, academia, government, youth social groups, students, trade associations, and private organizations, will hasten the accomplishment of sustainable development goals and mobilization of resources for financing development.

Chapter II. International peace and security

There should be mutual understanding and the development of effective communication strategies.

Conducive environment for regular dialogue among the stakeholders for peaceful and resilient communities.

The government should pay attention to most people's needs.

Eradication of fake news, corruption, and injustice at all levels.

Engagement of youth in leadership roles and participation in the decision-making process.

Integration of community culture in the policy framework.

Education, Capacity building, leadership, and skills development for youth.

Encouraging gender balance by giving everyone a voice in decision-making.

Meaningful employment and decent jobs for youth.

Infrastructural development and conducive framework conditions for business to thrive.

Chapter III. Science, technology and innovation and digital cooperation

Incorporation of local invention and creative ideas, their challenges and identification of innovative solutions for advancement to meet global standards.
Encouraging public-private partnership and coordination to explore strategic and innovative solutions for advancing Science, technology and digital cooperation.
Harmonization of local resources for technological development.
Government should Institute regulatory policies for the promotion of research and development.

Chapter IV. Youth and future generations
